Reasons for Refusal

1. The proposed development is located in an established residential area (A1), the objective of which is *"To protect and enhance the amenity and character of existing residential communities"*. By virtue of its scale and design, the proposed development is considered to represent an inappropriate form of development, which would be detrimental to the visual and residential amenities of the area, would set an undesirable precedent for other similar development, depreciate the value of property in the vicinity and would be contrary to the proper planning and sustainable development of the area.
2. The Applicant has failed to demonstrate the full extent and nature of the development in order to justify construction of a building of this scale at this residential location, which would be out of keeping with the established residential nature of the subject site and area. The development, if permitted for retention, would set an undesirable future precedent for developments of this kind and be contrary to the proper planning and sustainable development of the area.
