## Reasons for Refusal

**1.** The applicant has failed to demonstrate that the proposed vehicular entrance onto the L-28136 can provide adequate and unobstructed sightlines in accordance with the applicable road safety requirements. The achievement of the required sightlines appears to necessitate works on third-party lands which are outside the red-line boundary of the application, and no evidence of the consent of the relevant landowner(s) to undertake and maintain such works has been submitted. Accordingly, the Planning Authority is not satisfied that the proposed entrance, including the required setback and sightlines, can be safely provided and maintained. The proposed development would therefore endanger public safety by reason of traffic hazard and would be contrary to the proper planning and sustainable development of the area.

**2.** It is a policy (INF POL 16) of the Meath Development Plan 2021 – 2027, *"To ensure that all planning applications for new development have regard to the surface water management policies provided for in the GDSDS".*

The applicant has failed to demonstrate that the proposed development can provide for the satisfactory collection, treatment and disposal of surface water within the site. In particular, an adequately detailed SuDS-compliant surface-water drainage design has not been submitted; the proposed surface-water drainage arrangements are not contained within the individual property curtilages; and the proposed filter drains serving the dwellings are interconnected. Furthermore, insufficient information has been submitted in relation to the proposed diversion of the existing foul drainage infrastructure, including evidence of any necessary agreement or acceptance by Uisce Éireann**.** Accordingly, the proposed development, therefore, could lead to conditions which would be prejudicial to public health and would be contrary to the proper planning and sustainable development of the area.
